**\*\*** *Lawn sprinkler systems that use booster pumps or chemical injection systems must be tested every year. Check your city's plumbing code for their regulations.*

The Nebraska Department of Health and Human Services, Title 179 Regulations direct us to survey all our customers every five years, keep records of all tests on testable backflow preventers, and issue a reminder notice when testing is due. The customer shall provide access for inspection and testing by the District at all reasonable times to determine whether cross connections, sanitary hazards or other violations of District's water rules exist.

Thank you. This survey will help prevent accidental contamination of our drinking water system.
