GAS INFRASTRUCTURE REPLACEMENT

This project may require moving any inside gas meters to the outside of homes or businesses—all at no cost to you.

WHY

- Investing in your neighborhood
- To continue providing safe, reliable gas and water services by maintaining systems as efficiently and cost-effectively as possible
- Part of M.U.D.'s Infrastructure Replacement Program

WHEN AND HOW LONG

Work will begin soon and continue for a couple of months, barring any unplanned delays.

WHAT YOU MAY EXPERIENCE

PRELIMINARY WORK marking gas services in the area

- One of our technicians will be walking around the neighborhood flagging gas services.

DURING THE PROJECT gas main installation / reconnects

- Temporary traffic lane restrictions—for the safety of you and our crews, please slow down when driving in the area.
- Streets, sidewalks, lawns, and landscaping may be affected; however, all will be restored as weather permits.
- A series of small and large excavation pits to access the existing gas mains will be necessary. Generally, the larger holes on street corners will remain open for the duration of the project to make final connections at the end of the project.
- Trucks and equipment, gas pipe, safety fence and cones
- *After the gas mains have been installed, work will begin to reconnect all homes and businesses to the new mains. This work will result in a hole near the street in front of each home or business to make the connection.*

APPOINTMENTS requiring access to your home or business

- May require up to three (3) appointments—the first to coordinate the location of the new gas service and meter, and the others to:
 - reconnect your gas meter (M.U.D.)
 - relight gas pilots in your home or business (M.U.D.)
 - inspect sewer lateral service (Backlund Plumbing or Zoom Drain will contact you—the required inspection work is no cost to you)
- **You will be contacted** in the upcoming weeks to schedule these appointments. We strive to work with your schedule and do what we can to find a time that is convenient for you.
- This work may result in a brief planned temporary interruption of your gas service. A typical interruption could be 4 hours or less. Any appliance in your home or business that uses gas will not be available during the interruption (i.e., stove, water heater, furnace/boiler, etc.). Gas pilots will be relit by a M.U.D. technician after the interruption.

IMPORTANT TO NOTE

Scheduling your appointment(s) is critical so work in your area can proceed to completion and your service is not interrupted. We must have all gas services switched to the new main in a timely manner before taking the old main out of service. We appreciate your cooperation.

PPE

All staff have access to personal protective equipment and will use this equipment upon request.
