WATER INFRASTRUCTURE REPLACEMENT

This project may require the replacement of your water service line and meter to your home, all at no cost to you.

WHY?

- Investing in your neighborhood.
- Part of M.U.D.'s Infrastructure Replacement Program.
- To continue providing you with safe, reliable tap water by maintaining our water system as efficiently and cost-effectively as possible.

WHEN AND HOW LONG?

- Work will begin soon and continue for several months into 2022, barring any unplanned delays.

WHAT YOU MAY SEE

- Streets, lawns and landscaping may be affected; however, all will be restored as the project progresses or after the project.
- Excavation pits of various sizes.
- Trucks and equipment, water pipe, safety fence and cones.

TRAFFIC

- Possible lane restrictions in the area.
- For the safety of our crews, please slow down when driving in the area.

Hydrants are generally in easement or Right of Way (ROW) and may be moved to accommodate the new main location and meet all fire codes.

WATER SERVICE INTERRUPTION(S)

- *During* the water main installation, you may experience a brief interruption to your water service – a typical interruption could be 4 hours or less.
- *After* the new mains are in place, connection work from the homes or businesses to the new mains will take place – this work may result in a small excavation in front of your home or business and a brief interruption to your water service – a typical interruption could be approximately one-half hour.
- We will notify you in advance of any planned water interruption.

TO PREPARE FOR A WATER INTERRUPTION

To continue using a tank-style toilet, fill a container with water and have a bucket nearby to scoop water into the toilet tank and fill about halfway **for each flush**.

Fill containers with water and keep on hand during the interruption to allow for hand washing and drinking.

AFTER A WATER INTERRUPTION

It is normal for air to be in the water lines after a water interruption; please run your water for about 10 minutes to release the air.
