WATER INFRASTRUCTURE REPLACEMENT

This project may require the replacement of your water service line and meter to your home – all at no cost to you.

LOCATE UTILITIES

A technician from M.U.D. will be marking utilities with flags or paint. For the safety of everyone, please do not remove these flags or markings.

DIG EXCAVATIONS

Excavations of various sizes will be dug to access the existing water services and for main installation. Generally, the larger holes on street corners will remain open for the duration of the project to make final connections at the end of the project.

INSTALL NEW WATER MAIN

The crew plans to install the main underground and under driveways. If necessary, driveways may be impacted and will be restored.

RECONNECT SERVICES

Homes and businesses will be reconnected to the new main. This will include a temporary brief water service interruption which typically lasts 4 hours or less. You will be notified in advance of any planned service interruption. Please watch for a notification on your door.

FINAL CONNECTION AND ABANDONMENT OF OLD WATER MAIN

After water main installation and service reconnection work is completed, final connections will be made and the old water mains will be taken out of service. This work will be done in the larger corner excavations and will include a temporary brief water service interruption which typically lasts 4 hours or less. You will be notified in advance of any planned service interruption. Please watch for a notification on your door.

RESTORATION

Restore lawns, landscaping, sidewalks, driveways, and streets at the end of the project and/or as weather permits.

WHY

- Investing in your neighborhood.
- Part of M.U.D.'s Infrastructure Replacement Program.

WHEN AND HOW LONG

Work will begin very soon however we are not able to give a specific start date due to unplanned delays such as weather, equipment, current projects, or emergencies. Project duration is expected to be several months. **Please see map on reverse side. Some areas in Pine St and Hickory St will experience both water and gas work.**

TRAFFIC AND PARKING

Possible lane restrictions may exist. Parking on the street may be restricted. For the safety of everyone, please slow down when driving in the area.

TO PREPARE FOR A WATER INTERRUPTION

To continue using a tank-style toilet, fill a container with water and have a bucket nearby to scoop water into the toilet tank and fill about halfway **for each flush.**

Fill containers with water and keep on hand during the interruption to allow for handwashing and drinking.

AFTER A WATER INTERRUPTION

It is normal for air to be in the water lines after a water interruption; please run your COLD water for about 10 minutes to release the air.

Hydrants are generally in easement or Right of Way (ROW) and may be moved to accommodate the new main location and meet all fire codes.

Replacement Projects

WATER CONTRACTOR

GAS CONTRACTOR

Areas marked with red lines above will experience both water and gas infrastructure replacement – water first, then gas. This work will be back-to-back so we can get in and get out.

Projects WP1982 and GP2657
Water and Gas Main Replacement Areas
Customers in these areas will receive two separate letters – one for water and one for gas
