## WATER INFRASTRUCTURE REPLACEMENT

This project may require the replacement of your gas service line and meter to your home or business, all at no cost to you.

1

### LOCATE UTILITIES

A technician from M.U.D. will be marking utilities with flags or paint. For the safety of everyone, please do not remove these flags or markings.

2

### DIG EXCAVATIONS

Excavations of various sizes will be dug to expose services in front of homes and businesses and on corner lots to assist with installing the new main and making final connections. The corner lot excavations will be large and remain until final connections are made.

3

### INSTALL NEW WATER MAIN

The crew plans to install the main underground and under driveways. If necessary, driveways may be impacted and will be restored.

4

### RECONNECT SERVICES

Homes and businesses will be reconnected to the new main. This will include a temporary water service interruption. You will be notified in advance of any planned service interruption.

5

### FINAL CONNECTIONS

After water main installation and service reconnection work is completed, the old water main will be abandoned and taken out of service. This will include another temporary water service interruption. You will be notified in advance of any planned interruption.

6

### RESTORATION

Restore lawns, landscaping, sidewalks, driveways, and streets at the end of the project and/or as weather permits.

### WHY

- Due to recent water main breaks, M.U.D. will replace the water main in N 72nd Street from Pratt Street to just north of Bedford Avenue.
- Investing in your neighborhood.
- Part of M.U.D.'s Infrastructure Replacement Program.

### WHEN AND HOW LONG

**START** Friday, February 9, 2024

**DURATION** Approximately two months, barring any unplanned delays  
After M.U.D. work is complete, all street repairs will be turned over to the city.

### TRAFFIC

Southbound lanes in 72nd from Pratt to Bedford will be closed for the work. Northbound lanes in 72nd will be head-to-head in this area. For the safety of everyone, please slow down when driving in the area.

### TO PREPARE FOR A WATER SERVICE INTERRUPTION

To continue using a tank-style toilet, fill a container with water and have a bucket nearby to scoop water into the toilet tank and fill about halfway for each flush.

### AFTER A WATER SERVICE INTERRUPTION

It is normal for air to be in the water lines after a water service interruption. Please run your COLD water for about 10 minutes to release the air.

Hydrants are generally in easement or Right of Way (ROW) and may be moved to accommodate the new main location and meet all fire codes.
