

YOU'RE INVITED: LEAD SERVICE LINE REPLACEMENT PROGRAM COMMUNITY WORKSHOP

Hosted by Metropolitan Utilities District

Join us for an informative and engaging event to learn more about the Lead Service Line Replacement Program – a multi-year effort to replace customer-owned lead water service lines throughout our community.

This workshop is your opportunity to learn what to expect when the program reaches your neighborhood. We will explain how the replacement process works, why it is important and how you can prepare now.

We are providing three options to choose from:

Thursday, September 25
6 – 7:30 P.M.

Metropolitan Community College
Fort Omaha Campus: Swanson Conference
Center | 5300 N. 30th St.

Tuesday, October 7
6 – 7:30 P.M.

Metropolitan Community College
South Campus: CAM Building
2909 Edward Babe Gomez Ave.

Tuesday, November 4
12 – 1 P.M.

Online Webinar via WebEx
Those who submit an RSVP will receive
the meeting link prior to the webinar.

RSVP using the QR code to be entered into our raffle.

Must be present to win!

PRSRP PAID
US POSTAGE
PAID
OMAHA, NE
PERMIT #101

What to expect from the workshop:

- Learn why lead service lines are being replaced
- See how the process works from planning to restoration
- Hear what to expect during construction in your area
- Review project maps, timeline and future steps
- Q&A with M.U.D. representatives

Plus: Eligible households can request a free lead test kit and a Brita water pitcher to help reduce potential exposure now.

This is a great chance to get ahead of the curve, ask questions and understand how M.U.D. is working to protect our customers from lead in their home's drinking water.

We look forward to seeing you there!
