GAS MAIN INSTALLATION WORK

Dear Valued Customer,

We are writing to inform you that our crews will soon be installing new gas mains in your neighborhood.

Due to the size and material of these mains (12-inch steel), this work will be performed using an open-trench installation method within the public utility right-of-way. Whenever possible, we plan to bore the mains beneath driveways to minimize disruption.

In some cases, driveway access may be temporarily impacted during construction. If access to your driveway is temporarily blocked, please feel free to speak with the construction crew. They will be happy to accommodate you and move equipment as needed to provide access.

Project Start. Week of June 29, 2026

Duration. Timeline could extend into late Fall 2026

The timeline is subject to any unplanned delays and could shift as the work progresses.

Please note:

- Three separate construction crews may be working concurrently on this project. Please see the map for work locations.
- Motorists should anticipate occasional traffic restrictions and are encouraged to use caution and reduce speed when traveling through active construction areas.
- No service interruptions are anticipated, and the planned work is not expected to directly affect your natural gas service.

Crews will work to minimize any inconvenience, and we appreciate your patience as we complete this project.

If you have any questions or concerns, please contact me using the contact information below.

Sincerely,

Tina Gutschenritter
